Summary

Nikita Chernyi is a seasoned Senior Software Engineer with over a decade of backend development experience, specializing in Golang. He has a proven track record in building scalable, high-performance systems and optimizing cloud infrastructure for cost-efficiency. With a strong background in DevOps, Nikita has architected and maintained numerous microservices and high-traffic systems across industries like e-commerce, communication, and media.

As the founder of [etke.cc](#), Nikita is a dedicated open-source contributor, particularly in the Golang ecosystem, with projects focused on Ansible tools, Matrix-related services, and automation. His expertise spans from backend development to production deployment, with a consistent focus on delivering robust, scalable, and business-driven solutions.

- Experience
- etke.cc

February 2021 - Present

Founder

Remote

<https://etke.cc>

- Spearheaded establishment and growth of etke.cc, a managed Matrix hosting service.
 - Successfully launched etke.cc, providing a reliable and customizable communication platform.
 - Led team in enhancing automation framework for continuous improvement and stability.
 - Expanded functionality and versatility of services through new components integration.
 - Developed bots and tools to maximize matrix capabilities.
 - Provided assistance to numerous individuals and organizations in the matrix ecosystem.
 - Established efficient customer support tool chain, minimizing resolution time.
 - Achieved milestones: project initiation, server installations, global expansion.
 - Developed Scheduler for efficient server management and automation.
 - Implemented internal container registry mirror and monitoring system.
 - Integrated alerting functionality for timely notifications and proactive actions.
 - Emphasized openness through release of work as free software.

As Founder of etke.cc, demonstrated exceptional leadership, technical expertise, and commitment to reliable and innovative solutions. Positioned etke.cc as a trusted and forward-thinking player in the Matrix ecosystem.

- Crunchyroll

April 2021 - August 2023

Senior Software Engineer

Chisinau, Moldova

<https://crunchyroll.com>

- Integrated content ratings enhancements, boosting user engagement.
 - Spearheaded Elasticsearch stability improvements through smart scaling.
 - Collaborated to integrate Sony Music content, enhancing user experience.
 - Developed and implemented Dub Rendition functionality for dubbed content.
 - Integrated real-time recommendations using machine learning.
 - Implemented A/B testing for data-driven decision-making.
 - Optimized caching layer, increasing throughput and reducing servers.
 - Conducted vulnerabilities scanning and implemented security measures.
 - Implemented Discord Rich Presence integration for real-time updates.
 - Contributed to backend service development, improving navigation.
 - Enhanced search mechanisms for faster and relevant results.
 - Achieved successful project deliveries with improved system performance.
 - Demonstrated technical expertise, proactive problem-solving, and successful project deliveries at Crunchyroll.

- Titanium Soft

January 2017 - March 2021

Senior Backend Developer

Chisinau, Moldova

- Played pivotal role as Senior Backend Developer at Titanium Software.
 - Developed and supported custom solutions for diverse clients.
 - Streamlined deployment and management through "Infrastructure as Code."
 - Promoted collaboration, automation, and continuous improvement as a champion of the "DevOps way"
 - Implemented LDAP for efficient user authentication and access control.
 - Integrated code-quality analytic services and tools for adherence to coding standards.
 - Established efficient and scalable development practices through process and workflow building.
 - Contributed to open-source community by sharing code and best practices.
 - Led team in multiple projects, providing technical guidance and ensuring successful delivery.
 - Designed robust and scalable backend architectures to meet client needs.
 - Demonstrated profound understanding of backend development, DevOps methodologies, and architectural design at Titanium Software.
 - Contributed to project success, innovation, and excellence in software development.

- OpsWay

April 2014 - January 2017

Backend Developer

Remote

<https://opsway.com>

- Dedicated Backend Developer specializing in e-commerce solutions.
 - Developed and supported projects based on Magento Community and Enterprise editions.
 - Created over 10 Magento extensions, enhancing functionality and performance.
 - Employed dockerized approach for efficient product life cycle management.
 - Managed projects using Ansible for configuration, network, package, and data management.
 - Implemented processes reducing new instance preparation time to 10–15 minutes.
 - Provided significant contributions to customers' products with over 1000 contributions per year.
 - Demonstrated strong understanding of Magento and delivered high-quality solutions.
 - Proficient in Docker containerization and Ansible configuration management.
 - Committed to continuous improvement and achieving customers' business objectives.

As a Backend Developer, consistently delivered robust and scalable e-commerce solutions, driving success and meeting business objectives.

- Active Computers

March 2013 - March 2014

Support Engineer

Tiraspol, Moldova

<https://acomps.ru>

- Support Engineer at Active Computers, providing exceptional support and development services.
 - Addressed client inquiries and resolved issues promptly and effectively.
 - Collaborated with cross-functional teams to analyze and solve complex technical problems.
 - Enhanced multiple websites by implementing new features and optimizing performance.
 - Developed and maintained a custom web-based issue tracking system.
 - Investigated and resolved customer-reported issues with attention to detail.
 - Built strong client relationships and managed customer expectations.
 - Provided valuable feedback to the operations team for continuous improvement.
 - Consistently delivered excellent customer service, technical support, and contributed to the functionality and success of various websites.
